

Union Pacific Railroad

49 C.F.R. § 1250.4

Report of significant rail infrastructure projects

September 4, 2018

1. SIT Yard and Yard Expansion

Description and Purpose:

Construct a new storage-in-transit (SIT) yard at Angleton, TX along with an accompanying classification yard expansion to the existing yard. The primary purpose of the overall project is to increase Union Pacific's capacity to handle increasing plastics traffic and SIT infrastructure demands.

Location:

Angleton, Brazoria County, Texas

Estimated completion date:

2019

Update

Project continues as described.

2. Port Laredo

Description and Purpose:

Terminal expansion and modernization project to provide increased capacity and higher productivity as well as increased safety at the intermodal ramp.

Location:

Near Laredo, Webb County, Texas

Estimated completion date:

Phase 1 completed, remainder of project on hold.

Update

Project continues as described.

3. LATC

Description and Purpose:

This project will create incremental capacity necessary to support projected domestic and international intermodal volume growth at the Los Angeles Transportation Center (LATC) yard and enable more efficient handling of existing traffic in the LA Basin.

Location:

Los Angeles, Los Angeles County, California

Estimated completion date:

2020

Update

Project continues as described.

4. G4 Intermodal facility

Description and Purpose:

This project will create incremental capacity necessary to support projected domestic and international intermodal volume growth in the Chicago market and enable more efficient handling of existing traffic in Chicago.

Location:

Joliet, Will County, Illinois

Estimated completion date:

2019 – 2020

Update

Project continues as described.

5. Geneva 3rd Main Track

Description and Purpose:

Construct 8 miles of new third main line track which will create a 41 mile stretch of triple main line track on Union Pacific's Geneva Subdivision, which runs from Chicago to Clinton, Iowa. The project will enhance fluidity, improve premium service, and improve passenger on-time performance on the corridor.

Location:

Chicago area, Cook, DuPage, and Kane Counties, Illinois

Estimated completion date:

2021

Update

Estimated completion date changed from 2020 to 2021.

6. Brazos Classification Yard

Description and Purpose:

Greenfield classification yard project designed to classify manifest traffic passing through Texas. This project will support projected growth from the Gulf Coast and Mexico while enhancing fluidity and reducing congestion at existing Network terminals across the Southern Region.

Location:

Hearne, Robertson County, Texas

Estimated completion date:

Second half 2019

Update

Estimated completion date changed from second half 2020 to second half 2019.
